

6516208097.txt

I am a truck driver and drive from state to state, city to city and enjoy being able to get great reception at all times. It is a benefit and a lifeline at times for me to hear current and up to date weather and traffic reports. To take this away would be a horrible injustice to my safety on the road. Driving is my livelihood and X-M radio helps me to stay alert at all times. I want to urge the FCC to please reject NAB's petition 04-160 and support XM's programming.

Thank You

Jerry Viles
